

# Comandos para instalar MeshCentral

## Eliminar Teamviewer

```
apt purge -y teamviewer-host
apt update
rm -r /home/cvc/.local/share/teamviewer15/
rm -r /home/cvc/.config/teamviewer/
rm -r /home/cvc/.cache/TeamViewer/
rm -r /root/.config/teamviewer
rm -r /root/.local/share/teamviewer15
```

## Instalar agente de MeshCentral

```
rm -r mesh/; mkdir mesh && cd mesh && curl
"https://comunicacionvisualcanarias.com:444/meshagents?script=1" -o
./meshinstall.sh && chmod 755 ./meshinstall.sh && echo 'cvc' | sudo -S -E
./meshinstall.sh https://comunicacionvisualcanarias.com:444
'BWd1yDz9wBrA8h8LPbilzrLJqwICVU10yVuEeM02g0LjaWPq4bf$hQlkrb41yX2@'
```

## Identificar equipo (version 2021-2023)

```
jq '.info.device.name, .info.device.type' /home/cvc/system/server.json; echo
"Teamviewer ID:" $(grep 'ClientID' /opt/teamviewer/config/global.conf | cut -d' ' -f
4)
```
