- Cash Converters

```
<?php
if ( isset($_GET['sum']) ) {
    require __DIR__.'../boot.php';
    global $mysql;
    $devices = $mysql->consulta('SELECT id, power FROM devices');

    foreach ($devices as $k => $dev) {
        $power = json_decode($dev['power']);
        $domingo = $power->D->on;
```

```
$lunes = $power->L->on;

if ($domingo == "") { // Si no enciende domingo, cambia lunes
    $parts = explode(':', $lunes);
    $parts[0] += $_GET['sum'];
    $newLunes = str_pad($parts[0], 2, '0', STR_PAD_LEFT) . ':' . $parts[1];
    $power->L->on = $newLunes;
} else { // Si enciende domingo, cambia domingo
    $parts = explode(':', $domingo);
    $parts[0] += $_GET['sum'];
    $newDomingo = str_pad($parts[0], 2, '0', STR_PAD_LEFT) . ':' . $parts[1];
    $power->D->on = $newDomingo;
}

$sql = "UPDATE devices SET power='".json_encode($power)."' WHERE
id=".$dev['id'];
//echo $sql . '<br><br>';
$mysql->consulta($sql, false);
}

echo "Se ha sumado " . $_GET['sum'] . " horas a todos los equipos";

\cache\clearAll(\cache\type::all);
}
?>
```
