Snippets útiles para consultas SQL

Copia de eventos en intervalos de tiempo

```
DROP TEMPORARY TABLE IF EXISTS temptab;
CREATE TEMPORARY TABLE temptab ( hora TIME );

DELIMITER //

FOR i IN 1..55
DO
    SET @HOUR = 8+TRUNCATE(i/4,0);
    SET @MINUTE = (i*15)%60;
    SET @horaCompleta = CONCAT(@HOUR, ':', @MINUTE, ':00');
    INSERT INTO temptab(hora) VALUES(@horaCompleta);
    INSERT INTO
events(`name`, `type`, `dateFrom`, `dateTo`, `time`, `weekdays`, `devices`, `data`)
VALUES(
    CONCAT('MarketPuertoRico-AvisoNatural',i),
    'media',
    '2023-01-01',
    '2060-01-01',
    @horaCompleta,
    127,
    '1,138,168,169,170,172,173,174,175,176,177,178,179,180,181,182',
    '455'
);
END FOR;
//

DELIMITER ;

SELECT * FROM temptab;
```
